Diablo Canyon Nuclear Power Plant (DCPP) Exercise

There will be a FEMA evaluated exercise with Diablo Canyon Power Plant (DCPP) on Wednesday, 11/02/16, beginning at approximately 0800 hours and ending at approximately 1400 hours. The focus of the drill is to train staff, evaluate procedures, and identify areas that need improvement. This is part of the formal evaluation process by FEMA for nuclear power emergency preparedness that allows California to demonstrate we can protect the public from an unlikely incident at DCPP. Staff from DCPP and local, state, and federal agencies will be participating. The San Luis Obispo County Emergency Operations Center (EOC) and the State Operations Center will be activated and supported by the California State Warning Center.

WEATHER SYNOPSIS BY REGION

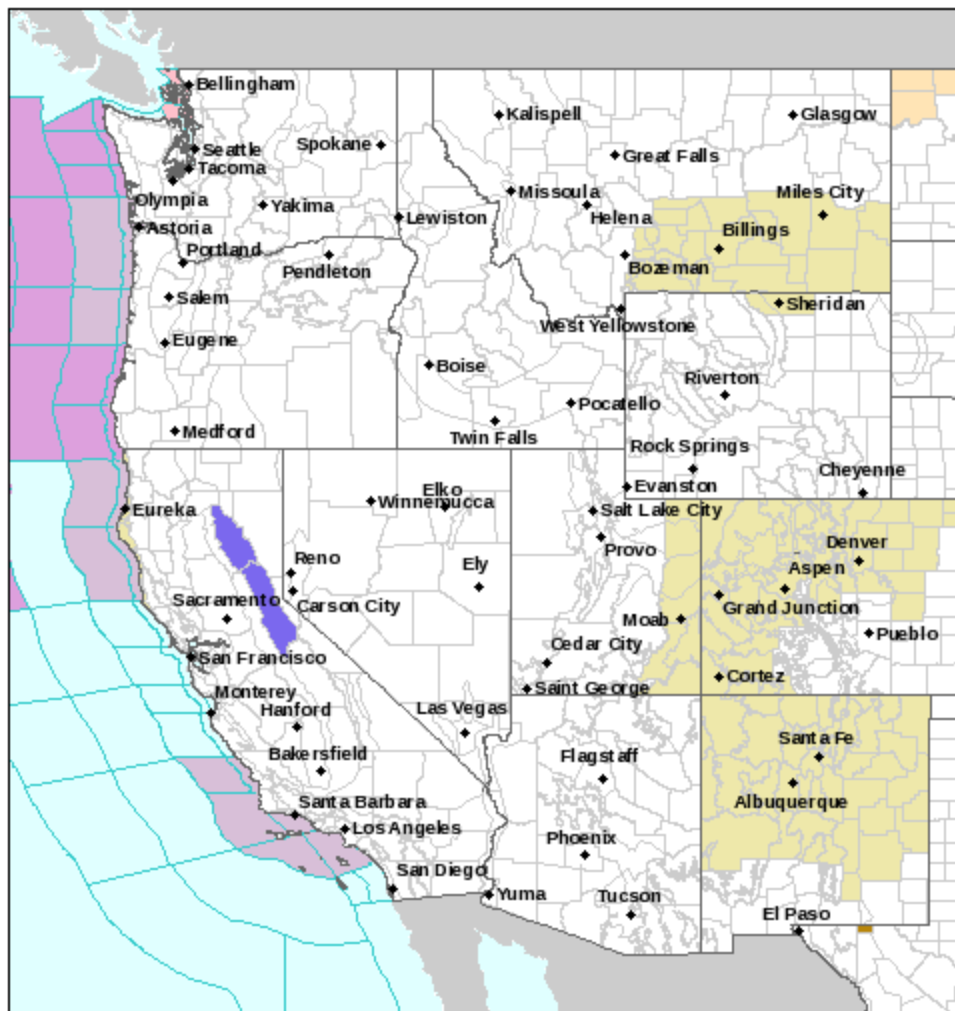

NORTHERN CALIFORNIA

Unsettled weather will continue through the upcoming week. This afternoon will be the last in a series of very wet weather systems to move through Northern California. There will be a break in the wet weather Wednesday through Friday, except the northwest areas are likely to see some more precipitation as a yet another weather system moves across that area Wednesday. A moderately wet weather system is anticipated to move through Northern California over the weekend as well. Temperatures will warm to around seasonal normals or slightly above this week at around 70 for the warmest inland areas Thursday and Friday. No extremes in winds are expected over the next 7 days, although there will be some breezy periods.

SOUTHERN CALIFORNIA

Pacific trough will cause temperatures to remain 5 to 10 degrees below normal through today, with upper 40s and 50s across the mountains and 60s to low 70s in the valleys. Westerly winds of 15 to 25 mph with gusts to 40 mph will surface across the mountain ridges and desert passes through this afternoon. Isolated showers will occur over the far northern parts of Central California through this morning. A strong ridge of high pressure will build into California from the Pacific bringing significant warming and drying to the region Wednesday through Friday. North winds of 15 to 25 mph with gusts to 40 mph will surface across the South Coast of Santa Barbara and the Grapevine Tuesday night. There will be northeast to east winds of 15 to 25 mph with gusts to 40 mph over the mountains and below the canyons and passes of Southern California Wednesday morning through Thursday afternoon. The ridge of high pressure will weaken bringing a cooling trend and increase in humidity to the area this weekend.
